

Qu'est-ce qu'ils disent à propos des haut-parleurs Briston

"I think the Middle Ts' spatial performance was as much a result of their smooth, untiring treble"

"The midrange was equally satisfying"

"The bass, too, was outstanding for a speaker of this size, as attested by the sheer weight and power of the low end with the bass drum"

"In an admittedly unfair face-off, the Middle Ts sounded as cleanly and smoothly integrated as my B&W 800 Diamonds (\$24,000/pair), and threw nearly as big a soundstage"

"The Middle T is an excellent speaker, and an excellent value at \$5400/pair—

it bears comparison with speakers costing much more"

I consider the Model Ts an outright bargain and a great choice for people who value technical accuracy in harmony with musicality.

"The Middle Ts are a terrific product"

"It's pointless to try to describe these speakers by their sound, as they are perfectly at ease no matter the part of the spectrum we choose to examine"

"the Mini T can be compared comfortably with speakers costing two or even three times the asking price. You have to hear these!"

the absolute sound

Indeed, these are one of the few speakers I've experienced which do the trick of realistically putting a singer, guitarist, bassist, what have you, in the next room. Doing my laundry I could swear on a stack of TAS back issues that Ella Fitzgerald was right there next door in the listening room.

"Do the Mini Ts rock? Oh yes, they do"

"Over the weeks that I spent with the Mini Ts, I did not find a single track or musical category that did not sound absolutely right"

CANADA HiFi

"The speed at which bass from the Middle Ts can bloom and then disappear is astonishing"

"While doing critical listening, I often got distracted and too lost into the music, which is an important characteristic; I look for in audio components. But when I could remain focused on the Middle Ts, they impressed me with every song I sent their way"
